Manufacturer's Description

The Fusion is designed to be the ultimate multi-purpose boat, perfect for any application whether being sport, commercial or leisure. Functional simplicity is what we pride ourselves on. We have built a reputation for quality constructed boats with admirable capabilities since 2013.

The Fusion 19 is our ever-popular all-round family boat, whether you are looking to fish, ski or cruise, this boat can handle it all. A smaller version of our flagship model, the Fusion 21, but with all the features that the bigger model has to offer.

'The Fusion Difference'

Safety

Each Fusion boat is manufactured with a built in kevlar keel strip. During the construction of the hull, a layer of kevlar is laminated along the keel of the boat, creating an impenetrable and strong keel. Our 89 – 116% offshore buoyancy foam far exceeds the safety requirement of 60% polyurethane foam.

Versatility

The Fusion was designed to allow for the flexibility of change. Whether you are going for a morning fishing trip alone or an afternoon cruise with your family. Our optional extras allow for further customisation and gives each boat owner the opportunity to build his dream boat functional according to his/her specifications.

Design

The Fusion design is based on the popular American bay boat design trend. This design allows for a smooth and stable boat which can accommodate a wide horsepower range. Clever use of deck space, console design and positioning allows for a spacious feeling.

Performance

The Fusion is super dry and stable in calm or rough conditions, making this craft easy to handle for the whole family.
