## Description

### FUSION POWER BOATS 19 - Fusion 'For the Fun of It'

Blue Lagoon Marine are the exclusive UK Distributor for Fusion Power Boats and are delighted to bring the phenomenal range of the F17, F19 & F21 to the U.K.

Built out of South Africa, the Fusion brand have built up a reputation of bringing to market the ultimate multi-purpose boat, perfect for any application: sport, leisure or commercial purposes. One of the features which makes Fusion boats so unique is the exceptional build quality with the aim to develop a versatile boat that is super dry and calm in stable or rough conditions. The boats are designed and tested in the Garden Route of South Africa with the main testing grounds being the infamous Knysna Heads.

Each boat features a full 'wet deck' meaning the deck is fully self draining. The hull is constructed using RAL Pigment and high-quality NPG gelcoats, layered with fiberglass and a built-in aramid/kevlar keel strip and the transom of the boat is strengthened using Coosa board; a high-density, closed-cell polyurethane foam, layered with fiberglass.

Fusion present a true 'go anywhere' boat with fantastic capabilities to ensure a safe ride, no matter what conditions are presented.

The Fusion 19 includes a significant and carefully chosen standard specification including a 150HP Mercury engine.

The F19 can also be configured in a range of fantastic colour options (GRP not wrapped!) at no extra charge.

Please contact the team at Blue Lagoon Marine today to find out more information, check stock or place an order for your new Fusion

### Other

Builder: **Fusion Power Boats**

## Manufacturer's Description

The Fusion is designed to be the ultimate multi-purpose boat, perfect for any application whether being sport, commercial or leisure. Functional simplicity is what we pride ourselves on. We have built a reputation for quality constructed boats with admirable capabilities since 2013.

The Fusion 19 is our ever-popular all-round family boat, whether you are looking to fish, ski or cruise, this boat can handle it all. A smaller version of our flagship model, the Fusion 21, but with all the features that the bigger model has to offer.

### 'The Fusion Difference'

#### **Safety**

Each Fusion boat is manufactured with a built in kevlar keel strip. During the construction of the hull, a layer of kevlar is laminated along the keel of the boat, creating an impenetrable and strong keel. Our 89 – 116% offshore buoyancy foam far exceeds the safety requirement of 60% polyurethane foam.

#### **Versatility**

The Fusion was designed to allow for the flexibility of change. Whether you are going for a morning fishing trip alone or an afternoon cruise with your family. Our optional extras allow for further customisation and gives each boat owner the opportunity to build his dream boat functional according to his/her specifications.

#### **Design**

The Fusion design is based on the popular American bay boat design trend. This design allows for a smooth and stable boat which can accommodate a wide horsepower range. Clever use of deck space, console design and positioning allows for a spacious feeling.

#### **Performance**

The Fusion is super dry and stable in calm or rough conditions, making this craft easy to handle for the whole family.
